

Spectrum Printing - Standard leaflets

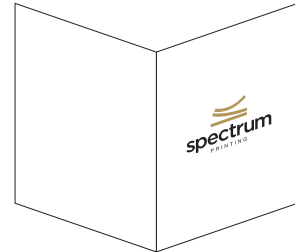

Usually A4 or A5

These leaflet types can be folded in multiple ways as shown. They can also have end pages made smaller, have perforations instead of folds as tear off pages or slips, and if the stock is above 150gsm in thickness, we crease them to create a smooth folded edge.

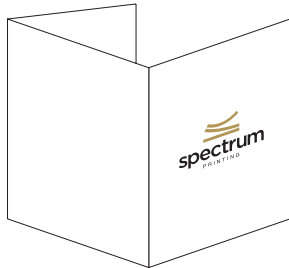

Single page

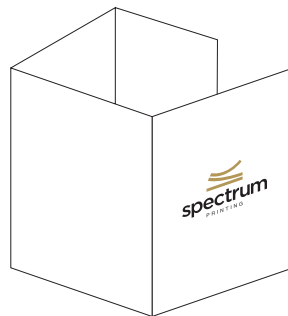

4 page

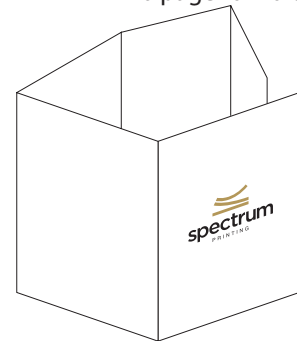

6 page roll fold

8 page roll fold

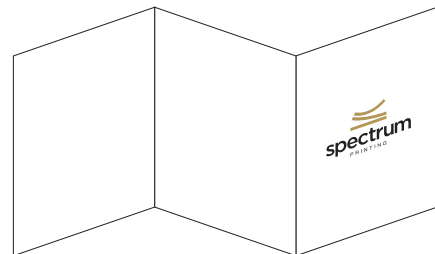

10 page roll fold

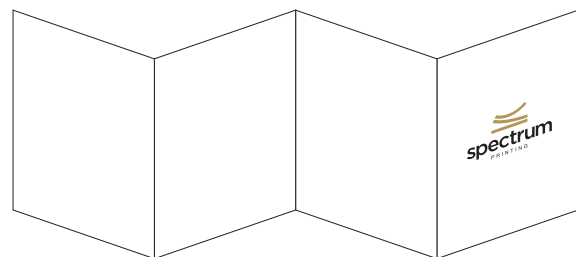

Right angle fold

6 page concertina

8 page concertina

Double parallel fold

10 page concertina
